SUMMARY

Researcher, designer, and analyst with an MSc in Human-Computer Interaction, a Bachelor of Design in Interior Design, and 6+ years of professional design and project experience, plus 2+ years of mixed-methods research. Understands how people experience both physical spaces and digital systems. Designed an AI-assisted medication tool for people with dementia that won first place, studied an AI therapist with about 20 participants, and built a 16-category framework for evaluating manipulative patterns in generative AI. Redesigned a B2B financial dashboard with 5+ recommendations adopted and an admissions process that cut follow-ups by 20% and raised throughput by 30%+. Turns research and data into clear requirements, recommendations, dashboards, and prototypes, and works across product, engineering, clinical, and business teams.

SKILLS

Research: User Interviews · Surveys · Usability Testing · A/B Testing · Focus Groups · Mixed-Methods Research · Generative and Evaluative Research · Research Synthesis · Heuristic Evaluation · Qualtrics · Dovetail · Maze

Product & Design: Product Requirements · Information Architecture · Interaction Design · User Flows · Wireframing · Prototyping · Design Systems · Components and UI Patterns · Accessibility · Figma · Figma Make · Framer · UX Pilot · Adobe Creative Cloud · Axure

Data & Operations: Data Analysis · Root Cause Analysis · Process Improvement · Project Coordination · Timelines and Deliverables · Documentation · Dashboards · Data Visualization · Power BI · Tableau · Excel · Microsoft Office 365

AI & Domains: Responsible AI · Human-AI Interaction · AI Evaluation · Dark Patterns · Vulnerable Users · Healthcare Technology · Financial Services · Claude Code · Cursor · ChatGPT · Claude · Gemini · Copilot · Perplexity · NotebookLM · HTML/CSS · Vercel

Collaboration: Cross-Functional Teams · Stakeholder Communication · Executive Presentations · Written Communication · Notion · Miro

EXPERIENCE

UX Designer, Data Visualization July 2025 - September 2025

MainStreet Advisors, a Fifth Third Bank Subsidiary · Internship · Chicago, IL

- Redesigned a B2B financial dashboard used daily by 5 portfolio managers, delivering 5+ recommendations adopted by Product, Engineering, and Design.
- Used interviews, usability testing, A/B testing, and secondary research to validate information architecture, interaction patterns, and data visualization decisions.
- Completed 100+ design iterations and shortened the release timeline by 2 sprints by bringing research and interaction design into product planning while requirements were still flexible.

UX Designer & Project Manager January 2026 - June 2026

ASAP, AI-Scaffolded Action Planner, Capstone Project · DePaul University · Chicago, IL

- Defined the interaction model for an AI task-planning product that converts ambiguous user goals into actionable workflows across work, school, and personal tasks.
- Used interviews, focus groups, usability testing, A/B testing, and 12 AI-assisted interviews to identify friction and validate product decisions.
- Translated findings into product requirements, information architecture, interaction patterns, and a functional deployed prototype using Figma Make, Cursor, Claude Code, and Vercel.

UX Researcher September 2025 - October 2026

RAISE Lab, DePaul University · Graduate Researcher · Chicago, IL

- Investigating whether and how generative AI systems use dark patterns, AI persona manipulation, and anthropomorphism cues to erode user agency, with attention to effects on vulnerable populations.
- Translating qualitative observations of AI behavior into structured research questions, evaluation criteria, and design implications for responsible, human-centered AI.
- Recognized with the Director's Award for Outstanding Researcher and the Authorship Contribution Award for research contributions.

Research Lead & UX Designer March 2025 - September 2026

RAAHI, Dark Pattern Detection Framework & GenAI Study · DePaul University · Chicago, IL

- Originated and designed a Chrome extension that identifies manipulative interaction patterns in generative AI, establishing the product's end-to-end flow, information architecture, and interaction model.

- Created a 16-category evaluation framework across ChatGPT, Claude, and Gemini, translating observed behaviors into structured product and evaluation requirements.
- Built and iterated the working prototype using research findings to determine how users identify, interpret, and review flagged interaction patterns.

UX Researcher & UX Designer November 2024 - May 2025
Wellnut, VR Mental Wellness Product · DePaul University · Chicago, IL
- Validated the product with ~20 participants, with ~70% rating the concept useful and participants reporting lower stress after use.
- Designed the AI therapist experience across interaction flows, dialogue, avatar behavior, conversational tone, and session structure, incorporating usability findings into iterations.
- Translated clinician input into product safeguards including session limits, expectation-setting, and escalation pathways, embedding safety into the experience.

Design Researcher June 2025 - June 2026
International Admissions, DePaul University · Chicago, IL
- Reduced counselor follow-up volume by 20% and increased operational throughput by 30%+ by redesigning how incoming requests were categorized, prioritized, and assigned.
- Analyzed 1,000+ application records across 50+ markets to identify recurring workflow patterns and requirements affecting admissions review.
- Combined system data, workflow observation, and AI-assisted analysis to identify operational improvements and clarify ownership across internal workflows.

UX Designer June 2026 - Present
MeDementia, Miro × Kiro Hackathon · First Place · New York, NY
- Won 1st place by defining the product experience for an AI-assisted medication-management tool serving people with dementia and caregivers.
- Designed the end-to-end interaction model, simplifying medication workflows, information hierarchy, navigation, and error recovery for a high-risk healthcare use case.
- Translated accessibility and cognitive-load requirements into product decisions and extended the concept into a functional prototype through continued development.

UX Researcher & Product Designer July 2025 - October 2025
Cost of a Click, Interactive AI Infrastructure & Environmental Impact Installation · Chicago, IL
- Designed an interactive experience translating complex AI infrastructure research into an understandable digital, physical, and visual product experience.
- Defined the end-to-end interaction from user prompt to resource-use feedback, including interface, physical response, video, and data visualization.
- Partnered with engineers to connect the experience in real time and built the supporting digital product in Framer.

Senior Designer January 2023 - July 2024
Aedium Design · Hyderabad, India
- Sustained 9/10 client NPS across B2B engagements by owning projects from discovery and requirements definition through design delivery and implementation.

Senior Design Consultant April 2021 - December 2022
HomeLane · Hyderabad, India
- Reduced design-to-build latency by 15% across 10+ concurrent projects by translating customer requirements into structured specifications and resolving constraints before execution.

Design Consultant July 2019 - June 2021
TheM Design Studios · Hyderabad, India
- Delivered 15+ end-to-end B2C projects, managing customer requirements, design development, documentation, and execution coordination.

EDUCATION

MSc, Human-Computer Interaction · DePaul University, Chicago, Illinois, United States
MA, Design Management & Entrepreneurship · De Montfort University, Leicester, United Kingdom
Postgraduate Certificate, UX Design · Indian Institute of Technology Bombay, India
Bachelor of Design, Interior Design · Jawaharlal Nehru Architecture and Fine Arts University, Hyderabad, India

AWARDS

Director's Award for Outstanding Researcher · RAISE Lab, DePaul University, 2025-2026
Authorship Contribution Award · RAISE Lab, DePaul University, 2025-2026
Outstanding Performance Award · HomeLane, 2022
